DETAILED ACTION

This application is in condition for allowance except for the following formal matters:

Claim Objections

Claims 16 is objected to because of the following informalities: Line 7, delete “,” after the word “collection”. Appropriate correction is required.

Claims 25 is objected to because of the following informalities: Lines 4 and 5, the phrase “method described in claim” is incomplete. Applicant is suggested to insert the claim number. Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm’r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

The following is a statement of reasons for the indication of allowable subject matter: As to claims 16 – 28, the prior art fails to show a beam measuring device comprising a plurality of magnetic field sensors, arranged in a shielding space which is formed by the magnetic shielding part, the magnetic field sensors measuring a magnetic field which a beam current to be measured generates; wherein the magnetic field collection mechanisms are arranged such that a superconductive surface shielding

current is concentrated on a predetermined region by interrupting the superconductive surface shielding current except for a predetermined region on a superconductive surface of the magnetic field collection mechanisms; wherein the magnetic field collection mechanism includes a bridge portion which has only a portion thereof constituted of a high-temperature superconductive body on an outer peripheral portion; and wherein the magnetic field collection mechanism concentrates a superconductive surface shielding current which the beam current generates in the vicinity of a plurality of magnetic field sensors. These features taken together with the other limitations of the claim renders the claims allowable over prior art.
